CHESHIRE FIRE AUTHORITY

MEETING OF

FIRE AUTHORITY

DATE

12 SEPTEMBER 2002

REPORT OF

TREASURER

SUBJECT

STATEMENT OF ACCOUNTS 2001-02

ITEM: 2

Summary

The Authority is required to approve the Statement of Accounts for 2001/02 by 30 September 2002. Attached to this paper is the Statement.

Recommendation

2 That the Statement of Accounts for 2001/02 be approved.

Background

- The draft Statement of Accounts for 2001/02 is attached as an Appendix to this report. The Accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting as recommended by the Chartered Institute of Public Finance and Accountancy [CIPFA].
- The Accounts have been subject to external audit and there are no issues that need to be drawn to Members' attention. Once they have been approved, the External Auditor will issue his audit certificate and then they will be published. A verbal report by the Treasurer will be given at the meeting.

2001/02 Statement of Accounts

The Authority at its meeting on 20 June 2002, received a report on the provisional revenue and capital outturn for 2001/02. Following the external audit of the accounts, there have been some changes to the final expenditure figures. The outcome of these adjustments is that the provisional outturn has reduced from an underspend of £733,000, to an underspend of £698,000. It was found that, as a result of an adjustment to the cashflow, additional interest accrued to 2001/02 of £11,000. This was offset by the need to post back to 2001/02 late invoices totalling £46,000. The net impact of these adjustments is to reduce the underspend by £35,000, to £698,000.

Revenue

The final outturn underspend of £698,000 relates to the following Resource Centres:-

	£000
Service Operations	99 Overspent
Firefighters Pensions	718 Underspent
Interest on cash balances	34 Underspent
Other Budgets	45 Underspent
Total	698 Underspent

- At the meeting on 20 June 2002, the Authority agreed to utilise part of the 2001/02 underspend to fund the following projects:-
 - [1] The provision of a Portacabin to alleviate the accommodation problems at Service Headquarters £75,000
 - [2] Pump priming to start the asset management issues at Macclesfield, Runcorn, Nantwich and Ellesmere Port £150,000
 - [3] Allocate funds to develop the Community Fire Safety Centre at Chester £100,000
 - [4] Systems change-out, temporary Support Staff £60,000
 - [5] The balance of £313,318 to be transferred to the earmarked reserve.
- Note 15 to the Balance Sheet analyses the earmarked reserve, which now stands at £3,097,000.
- The Revenue Account also shows a provision for debt repayment of £88,000. This is explained in Note 8 to the Revenue Account. The CFA has agreed that a provision above the statutory minimum of 4% should be made to recognise the estimated life of the assets being financed from loan.

Capital

10 Capital expenditure amounted to £1,023,000. This represents £774,000 from the capital programme and £249,000 structural maintenance which was funded from the revenue account, but which accounting rules state should be treated as capital, as it effectively improves or maintains the value of the property. In addition, there are capital commitments of £475,000, which have been charged against the Revenue Account as a contribution to a capital reserve. These commitments relate to slippage in the capital programme, the largest element of which refers to the provision for the construction of the Realistic Fire Training Centre [£397,000], the balance being made up of provisions for rescue enhancements, management information systems and communication developments.

11 Capital receipts from the sale of property totalling £40,000 were received in the year. These can be used to finance future years' capital expenditure. They have been added to the earmarked reserve and shown on the Balance Sheet as usable capital receipts. Members have agreed to utilise these receipts to fund the provision of a new fire station at Neston.

Overall

The Statement of Accounts shows the financial results of the fourth year of the Cheshire Fire Authority. They represent a firm foundation on which the CFA can prepare for the future.

INTRODUCTION TO THE STATEMENT OF ACCOUNTS by The Treasurer

The following pages comprise the Cheshire Fire Authority's Statement of Accounts for the year ended 31 March 2002. The statement includes an analysis of the Authority's financial position, a statement of responsibilities, a statement of accounting policies and the statutory accounts. The following paragraphs provide an explanation of the Fire Authority's financial activities. They review revenue and capital expenditure, and performance against the Authority's overall budget. In addition, the Statement of Accounts includes a summary of the revenue account in the form recommended by the Chartered institute of Public Finance and Accountancy, in its Best Value Accounting Code of Practice.

The published accounts are an important element in demonstrating the Fire Authority's stewardship of public money. They show the resources available and how they are used by budget managers in delivering fire services to Cheshire communities.

Local Government Reorganisation

This is the fourth year of the Cheshire Fire Authority. Until 31 March 1998 Cheshire County Council was the Fire Authority for the Cheshire area and as such all expenditure, income, assets and liabilities relating to fire activities were included within the statement of accounts of the County Council. As a result of Local Government Reorganisation (LGR), from 1 April 1998, Cheshire County Council, Halton Borough Council and Warrington Borough Council became fire authorities and are required to meet their obligations through a combined Cheshire Fire Authority (CFA). The CFA is an independent body and is legally separate from its constituent authorities.

The Fire Authority's Framework of Accountability

The CFA operates within a robust framework of accountability. The aim is to ensure that the CFA's financial systems are underpinned by sound internal controls. An Internal Audit service provided by the Treasurer monitors the operation of these systems and controls. On page 5 there is a statement of the Treasurer's responsibilities. This includes the requirement to ensure that the CFA manages its affairs to secure economic, efficient and effective use of resources and to safeguard its assets. Presenting the accounts on a fair basis is part of that responsibility.

Fire Authority Funding

There are various sources of income which fund the Authority's expenditure, including fees and charges generated by the Brigade and interest on cash flow. However, most of the expenditure is met by the constituent authorities in proportion to the council tax base. For 2001-02 the relevant proportions are:-

	%
Cheshire County Council	71.63
Warrington Borough Council	18.24
Halton Borough Council	10.13
	100.00

Analysis of 2001-02 Financial Position

The revised revenue budget for 2001-02 was £29.424m and the capital payments budget was £1.2m. Actual revenue expenditure for the year amounted to £28.726m representing an underspending of £698,000. Overspends on the Service's operational budget of £99,000 and the Authority's budget for Secretarial and financial services of £38,000, were offset by underspends on the pensions budget of £718,000, capital financing budget of £83,000 and additional interest earned of £34,000. Members approved the transfer of £385,000 to the Resource Centre Managers' Reserve. The balance of £313,000 has been transferred to the earmarked revenue reserve and will be used to help fund future years' budgets.

\$

Capital expenditure during the year was £1,498,000 including £525,000 of slippage from 2000-01 and £973,000 of the 2001-02 capital programme against a budget of £1,448,000. £475,000 has been transferred to the capital reserve to fund slippage.

The Fire-fighters' Pension Scheme allows fire-fighters to retire at age 50 providing they have 30 years service. There is a compulsory retirement age of 55 (or 60 for Assistant Divisional Officers and higher ranks). Up to a quarter of the annual pension can be commuted to a lump sum payment. A provision has been created which provides for the commutation element for all fire-fighters who could have retired in the year but who have decided to delay their retirement. The amount of the provision is £794,836.

Further Information

It is hoped that the information provided in this statement of accounts is clear and informative. Should you require any further information or if you have any comments, please contact, Mr Darren Griffiths, on telephone number 01244 602642.

Responsibilities of the Cheshire Fire Authority

The Cheshire Fire Authority is required:

to make arrangements for the proper administration of its financial affairs and to ensure that one
of its officers has the responsibility for the administration of those affairs. In Cheshire Fire
Authority, that officer is the Treasurer.

- to manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets.
- to approve the statement of accounts.

Responsibilities of the Treasurer to the Cheshire Fire Authority

The Treasurer is responsible for the preparation of the Authority's Statement of Accounts which, in terms of the CIPFA Code of Practice on Local Authority Accounting, is required to present fairly the financial position of the Authority at the accounting date and its income and expenditure for the year then ended.

The Treasurer is the statutory officer responsible to the Authority for the proper administration of the Authority's financial affairs and for ensuring that sound financial management operates within the Combined Fire Authority. The Treasurer will ensure that the Authority has regard to national requirements, including the Local Authority Accounting Code of Practice, the Code of Practice on Treasury Management and the Accounts and Audit Regulations. The CIPFA Best Value Accounting Code of Practice, introduced for accounting periods from 1 April 2000, requires the net cost of service shown in the revenue account to be analysed over the mandatory divisions of service prescribed by the Code.

In preparing this statement of accounts the Treasurer has ensured that:

- suitable accounting policies have been selected and applied consistently
- judgements and estimates made were reasonable and prudent
- the Code of Practice on Local Authority Accounting in Great Britain and the Best Value Accounting Code of Practice has been complied with

The Treasurer has also ensured that:

- proper accounting records were kept up to date
- reasonable steps for the prevention and detection of fraud and other irregularities were taken
- accurate representations were made to the Authority's Auditors, all relevant records were made available and any matters that could have had a material effect on the financial statements were disclosed

The Treasurer's Certificate

I certify that the Statement of Accounts presents fairly the financial position of the Combined Fire Authority as at 31 March 2002.

Signed:

Liz Lunn BA, CPFA Treasurer to Cheshire Fire Authority

Cheshire Fire Authority is responsible for ensuring that its business is conducted in accordance with the law and proper standards, and that public money is safeguarded and properly accounted for, and used economically, efficiently and effectively. In discharging this accountability, members and senior officers are responsible for putting in place proper arrangements for the governance of Cheshire Fire Authority affairs and the stewardship of the resources at its disposal. To this end, Cheshire Fire Authority is working towards developing a Code of Corporate Governance that will be consistent with the requirements of the CIPFA/SOLACE Framework 'Corporate Governance in Local Government: A Keystone for Community Governance'.

The Fire Authority has considered the topic of Corporate Governance and has asked that an assessment of the current arrangements against the CIPFA/SOLACE framework be undertaken and initially considered by the Standards Committee. Specifically the following work has been commissioned:

- (i) internal and external audit undertake an overall stock take of the adequacy of the Authority's existing corporate governance arrangements against the checklist.
- (ii) The Chief Fire Officer, Secretary and Treasurer develop and refine the Service risk assessment during 2002-03.

Once the assessment has been completed a Corporate Governance action list and a code will be brought forward for approval by Members. Following the approval of a Code of Corporate Governance it is proposed that the Standards Committee monitor compliance with the code and report to the Authority.

We are satisfied that the steps already taken will enhance our corporate governance arrangements and will ensure that a formal Code of Corporate Governance is in place by the end of the financial year 2002-03. Beyond this, steps will be taken to ensure that compliance with the Code is monitored and improvements put in place as part of a regular review process.

O!		
Signed	 	

John Joyce, Chairman of the Fire Authority

Steve McGuirk, Chief Fire Officer

on behalf of the Members of Cheshire Fire Authority and senior officers of Cheshire Fire Service.

Respective Responsibilities of Treasurer to the Fire Authority and Auditors

As described on page 5, the Treasurer is responsible for the preparation of the Statement of Accounts. Our responsibilities as independent auditors are established by statute, the Code of Audit Practice issued by the Audit Commission and our profession's ethical guidance.

We report to you our opinion as to whether the statement of accounts represents fairly the financial position and results of operations of the Authority.

We carried out our audit in accordance with the Audit Commission Act 1998 and the Code of Practice issued by the Audit Commission, which requires compliance with relevant audit standards.

Our audit included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Statement of Accounts. It also included an assessment of the significant estimates and judgements made by the Authority in the preparation of the Statement of Accounts and whether the accounting policies are appropriate to the Authority's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we consider necessary in order to provide us with sufficient evidence to give reasonable assurance that the Statement of Accounts is free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the Statement of Accounts.

Opinion

In our opinion the statement of accounts presents fairly the financial position of Cheshire Fire Authority at 31 March 2002 and its income and expenditure for the year then ended.

Certificate

We certify that we have completed the audit of accounts in accordance with the requirements of the Audit Commission Act 1998 and the Code of Practice issued by the Audit Commission.

The general principles adopted in preparing the accounts are those recommended by the Chartered Institute of Public Finance and Accountancy. They are in accordance with the Code of Practice on Local Authority Accounting and Statements of Standard Accounting Practice for which the Institute has issued guidance notes, except where further information is given below. The accounts have been prepared on an historic cost basis.

Basis of Inclusion of Debtors and Creditors in the Accounts

Income and expenditure are included in the accounts on the normal accruals basis apart from minor cash income, which is not shown in the accounts until it is received.

Deferred Charges

Deferred charges in respect of assets transferred or sold are written off to the fixed asset restatement reserve.

Fixed Assets

Expenditure on the acquisition, creation or enhancement of fixed assets is capitalised on an accruals basis in the Fire Authority's accounts provided that the fixed asset will yield a benefit for a period of more than one year. Assets acquired under finance leases are included, together with the liability to pay future rentals. Operational assets are included in the Balance Sheet at the lower of net current replacement cost or net realisable value in existing use. Non-operational assets are included in the Balance Sheet at the lower of net current replacement cost or net realisable value.

The values of properties used in the accounts are based on certificates issued by the County Council's Property Manager, Ian Gould FRICS. Work in progress is included in the accounts at cost.

Capital Receipts from the disposal of fixed assets are accounted for on an accruals basis.

Depreciation

Depreciation is provided for on all fixed assets with a finite useful life, and charges commence in the year of acquisition. Depreciation is calculated on the straight line method for the following items:

Property 50 years

Vehicles 13 years for appliances, 20 years for Hydraulic Platforms/Turntable

Ladders

Equipment 5-15 years

Depreciation on fixed assets is included in note 1 to the balance sheet.

Asset Charges

Charges made are sufficient to cover the sum of depreciation plus a notional charge based on the net book value of assets in the Balance Sheet. A market rental is charged where this is greater than the sum of depreciation plus the notional interest charge. The notional rate of interest used for assets included in the Cheshire Fire Authority's Balance Sheet is 6%. Asset charges are included in note7 to the revenue account.

Provision for Bad Debt and Debt Write Off's.

In line with proper accounting practice, the Service has reviewed all debts on an individual basis and judged that all debts will be collected. Consequently, for 2001-02 no provision or debt write off is necessary.

e^{ct} e

Provision for the Redemption of Debt

The CFA finances a substantial proportion of its capital investment projects by raising loans. The revenue account is charged with an amount sufficient to redeem 6 2/3% of outstanding debt and to meet accrued interest costs. The minimum statutory provision is 4%. However the nature of capital expenditure is predominantly on shorter life assets and so a higher rate than the minimum made is currently used.

Earmarked Reserve

The CFA cannot hold general reserves. Any surplus/deficit is refunded to or claimed from the constituent authorities. However with the agreement of the constituent authorities any underspending in the year would be held by the CFA and its use considered as part of future years' budget discussions. It is shown in the accounts as an earmarked revenue reserve and will be used in a planned way over the period 2003-09 to fund future commutation payments under the firefighters' pension scheme.

₩

☆

☆

☆

☆

☆

☆

☆

☆

Details of all reserves are provided in the notes to the accounts.

The fixed asset restatement reserve is increased by the surplus arising on new property valuations and reduced by the net book value of assets that have been disposed of and by capital expenditure that has not increased asset values.

The capital financing reserve contains amounts provided from revenue and capital receipts for the repayment of external loans, the amount of capital expenditure financed from revenue and capital receipts.

The capital reserve is held to finance capital expenditure that has slipped from the approved programme year.

Provisions

The firefighters' pension scheme allows firefighters to retire after 30 years service providing they are over the age of 50. The compulsory retirement ages for ranks of Station Officers and below is 55 and for ranks of Assistant Divisional Officer and above 60. Up to 25% of the annual pension can be commuted to a lump sum and most firefighters exercise this option. The provision provides for the estimated cost of commutations for those firemen who are eligible for retirement but who have decided not to retire.

Contingent Assets

Contingent Assets are not recognised in the Revenue Account or the Balance Sheet because prudence cautions that the gain might never be realised.

Interest

Cash which is surplus to requirements for over one month is invested in recognised institutions. For periods less than one month it is invested with Cheshire County Council who pay interest at the normal 7 day rate.

Leases

SSAP 21 identifies two types of lease transactions - operating leases and finance leases.

An operating lease involves the lessee paying a rental for the hire of an asset for a period of time which is substantially less than its useful economic life. The lessor retains most of the risks and the rewards of ownership in the case of an operating lease.

A finance lease normally involves payment by a lessee to a lessor of the full cost of the asset, together with a return on the finance to provide by the lessor. The lessee has substantially all the risks and rewards associated with ownership of an asset, other than legal title.

Uniformed Staff

The firefighter pension scheme is an unfunded scheme. The CFA meets the net cost of annual pensions, less firefighter's contributions from its annual revenue budget, together with the net effect of transfer values paid and received. Lump sum payments are also met from the revenue budget. (See note 4 to the revenue account)

b. Non-uniformed Staff

The Local Government Pension Scheme is a funded, defined benefits scheme, and is available to non-uniformed staff. The pension costs that are charged to the CFA's accounts in respect of non-uniformed staff represent the contributions paid to the funded scheme for these employees. Employer contribution rates are reviewed every 3 years. The review which took place at 31 March 1999 was effective for the three year period from 1 April 1999 to 31 March 2002. The employer contribution rate set at this review was 12%, which would be sufficient to meet 100% of existing and prospective liabilities, by around 2011-12 at the latest. (See note 3 to the revenue account)

Stocks

Stocks of clothing, uniform, vehicle spares and fuel are shown at cost. Stocks of stationery and catering supplies are not included in the balance sheet as such stocks are incidental and deemed not to be material to the accounts.

Investments

All investments are shown at the original cost price.

1 Expenditure and income have been analysed on a subjective basis and internal charges have been excluded from the analysis.

2 Summary Revenue Account

From April 2000, the Fire Authority's accounts must also be prepared in accordance with the Best Value Accounting Code of Practice on Local Authority Accounting as issued by the Chartered Institute of Public Finance and Accounting (CIPFA). Whilst being prepared on a total cost basis in accordance with the Code, the Summary Revenue Account has been included below in the old format to allow comparisons with the previous year's Summary Revenue Account.

3 Civilian Pension Costs – SSAP 24

In 2001-02 the CFA paid employer's contributions amounting to £244,000 (2000-2001 £336,000). This represented 12.00% (2000-2001 12%) of employees' pensionable pay (other than Fire Officers), into the Cheshire Pension Fund. The Fire Authority has also made payments to fund the costs of discretionary retirement benefits paid to employees who retire on the grounds of redundancy or in the efficiency of the service. The capitalised costs of all such retirements are as follows:

	£000's
Capitalised costs of Discretionary Retirements to 31 December 1999	263
Capitalised costs of Discretionary Retirements to 31 March 2001	133
Capitalised costs of Discretionary Retirements to 31 March 2002	
Total	396

These discretionary retirement costs have already been substantially provided for by way of an uplift to employer contributions to the Fund (and included in the figures set out above) or, in the case of retirements since 31 December 1999, by way of additional payments to the Fund

☆

The rate of employers contributions to the Fund is determined every three years based on a valuation by the Fund's Actuary. The effective valuation for the 2001-02 year of account was undertaken as at 31 March 1998. The main actuarial assumptions were:

	Nominal	Real	
	%pa	%pa	
La contra ant Datase			
Investment Return			
Equities	7.2	3.8	
Bonds	6.7	3.3	
Earnings Growth	4.9	1.5	
Price Inflation	3.4	0.0	

A valuation of the Fund was undertaken at 31 March 2001. The Actuary has advised that employer contribution rates will need to increase as a result of improved life expectancy (meaning that pensions will be in payment for longer than was previously assumed) and to take account of reduced expectations for future investment returns. For the Fire Authority the employer contribution rate will increase to 14.7% of pensionable pay. The new rate will come into effect from 1 April 2002.

4 Uniformed Firefighters Pension Costs – SSAP 24

In 2001-02 the net cost of pensions and other benefits amounted to £4.023m, representing 27.9% of pensionable pay. Using research information available and previous consultation with Cheshire County Council's Actuary, it is estimated that if the cost of pensions under the scheme had been determined in accordance with SSAP 24 'Accounting for Pension Costs', the regular cost of the scheme would have been £3.96m, representing 27.5% of pensionable pay, while the cost of spreading the unfunded accrued liability over 40 years would have been an additional £2.46m, representing 17.1% of pensionable pay.

9 Earmarked Revenue Reserve

Combined Fire Authorities are not permitted to hold general revenue reserves. However, the CFA and constituent authorities have agreed that any underspending on each year's budget be held on behalf of the constituent authorities and used primarily to fund pension commutation costs under the firefighters' pension scheme in future years budgets.

In setting the 2001-02 budget it was agreed that £291,000 of this reserve would be used. As a result, the transfer of the 2001-02 net underspend of £313,000, has been partially offset by the £291,000. The net effect is therefore an increase of £22,000 on the year:-

	2001-02	2000-01
	£000	£000
Cheshire County Council	16	972
Warrington Borough Council	4	248
Halton Borough Council	2	137
	22	1,357

10 Provision for the Repayment of Debt

The Authority is required by statute to set aside a minimum revenue provision for the repayment of external debt. The Authority's outstanding debt at 1 April 2001 was £1,324,736 and therefore the minimum debt provision requirement for 2001-02 is £52,990. However the Authority has decided to make a voluntary debt repayment provision of £35,768 to recognise the estimated life of the assets being financed from loan.

11 Recruitment and Publicity

Expenditure on publicity, as defined under the Local Government Act 1986, Section 5, totalled £81,527.

12 Officers' Emoluments

In accordance with the Accounts and Audit Regulations 1996, Section 6(2), the number of employees whose taxable emoluments for 2001-02 exceeded £40,000 is detailed below:

	Number of Officers		
	2001-02	2000-01	
£			
40,000-49,999	4	4	
50,000-59,999	0	2	
60,000-69,999	2	О	
70,000-79,999	0	1	
80,000-89,999	1	-	
90,000-99,999	-	-

14 Related Party Transactions

Under the 2000 Accounting Code of Practice, information in respect of material transactions with related parties is required to be disclosed. A number of these transactions have already been disclosed within the financial statements, as follows:

- (1) Transactions with other public bodies (i.e. Cheshire County Council, Warrington Borough Council and Halton Borough Council) have been disclosed within the revenue account and the cash flow statement, as well as in the other notes to the accounts.
- (2) Transactions with the Cheshire Pension Fund have been disclosed within the statement of accounting policies and notes to the revenue account.

There are no material transactions to disclose in respect of:

- (1) Partnership arrangements with organisations in the voluntary or independent sectors.
- (2) Members, Chief Officers, (including their close family) and the Fire Authority.

- Vehicles include £515,000 for five vehicles which were under construction as at 31 March 2002 and which have not been depreciated.
- Revaluations and Restatements includes the writing out of the gross book value of equipment purchased in 1988-89 and 1990-91 (£426,400) offset by the capitalisation of equipment purchased in 2000-01 (£38,000)

Valuation

The freehold and leasehold properties that comprise the Authorities property folio have been valued by Cheshire County Council's Property Manager, Ian Gould FRICS. The valuations have been prepared on the basis set out below in accordance with the Statement of Asset Valuation Practice and Guidance Notes of the Royal Institution of Chartered Surveyors, and CIPFA. Inspections were carried out between September and December 1999 and included all properties.

Specialist properties (including fire stations and Brigade Headquarters) have been valued on the basis of depreciated replacement costs, which includes an estimate of the value of the land in its existing use, together with the current gross construction costs of the building and external works, less appropriate deductions for age condition etc. The resultant valuation may therefore be less than a new replacement building.

All property was re-valued in 1999-00 and will be re-valued every 5 years. The revaluation and restatements line also shows other minor adjustments.

The Brigade housing stock has been valued on an open market basis.

Fixed Assets owned by the Authority on 31 March 2002 include the following:-

Fire Stations (including Headquarters and Control Room)	25
Fire Houses \(\)	53
Vehicles	89

6 Long Term Creditors

The Authority is required to pay the full actuarial cost of any early retirements to the Cheshire Pension Fund. These can be paid over a five year period. The long term creditor therefore represents the balance to be paid over the next four years.

7 Loans Outstanding – Long Term Borrowing

As at 31 March 2001 debt outstanding was £1,330,000. During the year a further loan was taken out for £606,000 which is due to be repaid in equal instalments over the next 25 years. The following table analyses long term borrowing by lender and debt maturity.

	Public Works Loan Board £000
Debt Maturity 7-15 years More than 15 years	437 1,499
Total	1,936

8 Amount set aside to meet Credit Liabilities (Memorandum only)

The Local Government and Housing Act 1989 requires the Authority to set aside a provision to meet credit liabilities. The provision reflects sums set aside from the revenue account for debt redemption together with the reserved part of capital receipts, less repayment of long-term loans and temporary loans.

The Pensions Provision has been created to ensure provision is made for fire-fighters' pension commutations which have slipped as a result of delayed retirements. The current provision represents estimated outstanding commutation payments for fire-fighters who could have retired by 31 March 2002, but have not elected to do so.

	2001-02	2000-01
	£000	£000
Balance of Provision at 1 April	855	702
Additional provision made in year	516	<i>575</i>
Amounts used in year	(576)	(422)
Balance of provision at 31 March	795	855

10 Fixed Asset Restatement Reserve

The balance on this reserve represents the difference in the valuation of assets under the previous accounting rules and the current method of capital asset accounting. During the year the reserve has been written down by the net book value of fixed assets that have been re-valued or disposed of, and capital expenditure that does not increase asset values. The balance on this reserve cannot be used to finance future capital expenditure.

2001-02	2000-01
000£	£000
Balance at 1 April 31,594	31,841
Disposal of Fixed Assets (51)	(66)
Revaluation of Fixed Assets 37	(181)
Write out of accumulated depreciation	
Balance at 31 March 31,580	31,594

11 Capital Financing Reserve

The Capital Financing Reserve contains the amounts that are required by statute to be set aside from capital receipts for the repayment of external debt, and the amount of capital expenditure financed from revenue and capital receipts. It also contains the difference between the amounts provided for depreciation and that required to be charged to revenue to repay the principal element of external loans. The balance on the reserve cannot be used to finance future capital expenditure.

Balance at 31 March	655	705

13 Usable Capital Receipts

With effect from 1 September 1998 all capital receipts can be used to finance capital expenditure. The receipts from the disposal of assets will be used to help fund future capital programmes.

	2001-02	2000-01
	£000	£000
Balance at 1 April	305	241
Usable capital receipts in year	40	64
Capital receipts applied to schemes in year		
Balance at 31 March	345	305

14 Resource Centre Managers Reserve

The CFA operates a devolved budget management scheme. Any Member approved carryforwards on Service resource centre managers budgets are transferred into this reserve. The reserve also includes specific approvals by Members to fund expenditure in future years.

	2001-02	2000-01
	£000	£000
Balance at 1 April	(9)	(13)
Transfer to (from) revenue in year	394	4
Balance at 31 March	385	(9)

15 Earmarked Revenue Reserve

Combined Fire Authorities cannot hold general reserves because although they are legally separate authorities, they are funded by contributions from their constituent authorities. As such any surpluses achieved are in effect due to the constituents. In Cheshire the constituent authorities have proposed that any surpluses achieved are to be taken into account in future years' budget setting by being included in an earmarked reserve for that purpose, to be used in a planned way over the period 2002-08 to fund future commutation payments under the firefighters' pension scheme.

17 Capital Contracts

The contract for the new Fire Awareness Training Unit was signed in March 2002. The value of this contract is £397,000.

18 Contingent Assets

There are currently two sites where the Fire Authority may benefit from land compensation claims relating to Manchester Airport 2nd Runway and Davenham By-Pass. If these claims are successful then income of £140,000 could accrue to the Authority.

19 FRS 17

FRS 17 is a new accounting standard for pensions. The objectives of the new standard are to ensure that:-

 Financial statements reflect at fair value the assets and liabilities arising from the employer's retirement benefit obligations and any unrelated funding;

 The operating costs of providing retirement benefits to employees are recognised in the accounting periods in which the benefits are earned by the employees and the related finance costs and any other changes in the value of the assets and liabilities are recognised in the accounting periods in which they arise; and ☆

22 June 2003	Full implementation of FRS 17.

Local Government Pension Scheme

The following information reflects, on an FRS 17 basis, the Fire Authority's position with regard to participation in the Cheshire Pension Fund (the Fund) which is part of the Local Government Pension Scheme (LGPS) as at 31 March 2002.

The Fund is a statutory defined benefit final salary scheme and all employees of the Fire Authority (other than Fire Fighters) may participate in the Fund.

The main financial assumptions used in the FRS 17 calculation are set out below:

Assumptions as at 31 March 2002	Total % per year	Real % per year
Price increases	2.8	-
Salary increases	4.3	1.5
Pension Increases	2.8	-
Discount rate	6.4	3.5

The fair valuation of the Fund's assets and the return expected from each asset class are:-

Assets (Whole Fund)	Long Term	Fund Value at	Proportion of
	Returns	31 March 2002	the Fund
	% per year	£000's	%
Equities Bonds Properties Cash	7.5	1,121,317	76%
	5.5	168,887	12%
	6.0	104,394	7%
	4.0	72,377	5%
Total		1,466,975	100%

The Fire Authority's share of the Fund's Assets and the present value of its pension liabilities as assessed on an FRS 17 basis as at 31 March 2002 was:-

Net Pension Liability	Cheshire Fire Authority
as at 31 March 2002	£000's
Estimated employer	
Assets	6,230
Less Present Value of	

Employer pension liabilities	6,674
Net pension liability	(444)

The net pension liability identified above does not represent an immediate call on the Fire Authority's reserves. Rather this is the notional amount, using the FRS 17 calculation basis, by which the Fire Authority's pension liabilities exceed its share of the Fund's assets. The Fire Authority's actual liability to the Fund is reviewed every three years as part of the triennial valuation of the Fund. The County Council makes contributions to the Fund over the expected future working lifetime of its employees (typically a minimum of 15 years) to ensure the Fire Authority's share of the Fund's assets are sufficient to meet its liabilities. These contributions are described further in note 3 to the Revenue Account.

合合

₩

The following information reflects, on an FRS 17 basis, the Fire Authority's position with regard to the Firefighters' pension scheme for the Cheshire Fire Authority as at 31 March 2002. Uniformed employees of the Cheshire Fire Authority may participate in the Firefighters' Pension Scheme, a defined benefit statutory scheme in accordance with the Firefighter's Pension Scheme Orders 1992 as amended. Unlike the Local Government Pension Scheme, the Firefighter's Scheme is "unfunded" which means that there are no assets. The FRS 17 net liability figure can therefore appear to be rather alarming. However, in practice pensions are paid from the Authority's revenue budget each year. The net pension liability identified below does not represent a real call on the Fire Authority's reserves. Rather this is the notional amount, using the FRS 17 calculation basis.

The main financial assumptions used in the FRS 17 calculation are set out below:

Total % per year	Real % per year	
2.8	-	
4.3	1.5	
2.8	-	
6.4	3.5	
	% per year 2.8 4.3 2.8	

The Cheshire Fire Authority accounts are prepared in accordance with CIPFA guidance and therefore the discount rate employed is the assumed long-term real rate of return on a portfolio of long-dated index-linked gilts, as determined by the Government Actuary's Department. The current real rate is 3.5% per annum. The inflation assumption has been derived by considering the difference in gross redemption yields of traditional and index linked gilt edged securities as at 31 March 2002. Salary increases are assumed to be 1.5% more than price increases.

The present value of the Fire Authority's Net Pension Liabilities as assessed on an FRS 17 basis as at 31 March 2002 was £129m.

20 Preparation for the Introduction of the Euro

The Fire Authority intends to ensure that it will be prepared for any implications that may emanate following the introduction of economic and monetary union (EMU) from 1 January 1999. Although the UK has not yet decided whether or not to join EMU, the Authority will ensure that all new equipment and computer software purchased as part of the planned replacement programme is Euro compliant, rather than making changes to existing systems. It is unlikely that there will be any significant costs until the UK decides to join EMU. As the Authority purchases its current financial information system and financial services from another public body, it will ensure that its suppliers systems are EURO compliant. In view of the relatively few European currency transactions currently taking place, separate bank accounts have not been deemed necessary. No significant expenditure was committed by the CFA on Euro preparations during 2001-02.

CASH FLOW STATEMENT 2001-02

This statement provides a link between the Balance Sheet at the beginning of the year, the Revenue Account for the year and the Balance Sheet at the end of the year. It looks at where the money came from and how it was spent for both revenue and capital activities and therefore reflects the changes in the financial structure of the Cheshire Fire Authority during the year.

Appropriations

Amounts transferred to or from revenue or capital receipts.

Asset Charges

From 1 April 1994, local authorities have been required to change the way in which they account for their capital assets. As part of the new system, the Authority has to charge the revenue account with the full economic costs of the assets used to deliver their services. These charges are called asset charges. The change in the method of accounting for capital does not affect the level of Council Tax.

Asset Management Revenue Account

The asset charges will be reversed in the asset management revenue account, ensuring that there is no impact on the level of Council Tax. This account will meet the charge for the depreciation on the Authority's fixed assets, and the external interest payable on the Authority's borrowing.

Budget

A statement of the Authority's expected level of service and spending over a set period, usually one year.

Capital Expenditure

Expenditure on the acquisition of a fixed asset or expenditure which extends the life of or adds value to an existing fixed asset.

Capital Financing Reserve

This reserve contains the amounts which are required by statute to be set aside from capital receipts for the repayment of external loans, and the amount of capital expenditure financed from revenue and capital receipts. It also contains the difference between the amounts provided for depreciation and that required to be charged to revenue to repay the principal elements of external loans. The balance on this reserve cannot be used to finance future capital expenditure.

Capital Receipts

Proceeds from the sale of capital assets. These can be used to repay outstanding debt or to finance new capital expenditure.

Contingencies

Sums set aside to cover unforeseen events where the cost is unknown or unforeseen expenditure which may be needed during the year.

Council Tax

The means of raising money locally to pay for Fire Authority services. This is a property based tax where the amount levied depends on the valuation of each dwelling.

Current Assets and Liabilities

Current assets are items which can be readily converted into cash. Current liabilities are items which are due immediately or in the short term. By convention these items are ordered by reference to the ease that assets can be converted into cash, and the timescale in which the liability falls due.

Fixed Assets

Tangible assets that yield benefits to the Authority and the service it provides for a period of more than one year.

.

Fixed Asset Restatement Reserve

The new system of capital accounting requires the establishment of this reserve. The balance represents the difference in the valuation of assets under the previous accounting rules and the current method of capital asset accounting. The reserve will be written down as assets are disposed of, and charged or reimbursed with deficits or surpluses arising on future re-valuations and capital expenditure which does not increase in values, e.g. maintenance. The balance on this reserve cannot be used to finance future capital expenditure.

Amounts which the Authority receives, or expects to receive, from any source. Income includes fees, charges, sales, capital receipts, and contributions from constituent bodies.

Long-Term Borrowing

Loans that are raised with external bodies for periods greater than one year.

Provisions

Provisions represent sums set aside for liabilities or losses which are certain to arise but owing to their inherent nature cannot be quantified with any certainty. The Authority's main provisions relate to hydrants, pensions and capital.

Reserves

There are two types of reserve; those which are available to meet current expenditure, and those which are not available to meet such expenditure. Most revenue reserves are capable of being used, but the reserves brought about by the new capital accounting system, namely the fixed asset restatement reserve and the capital financing reserve cannot be used to meet current expenditure.

Revenue Expenditure

Amounts which the Authority pays or expects to pay to any source – includes the cost of employees, premises, transport, supplies and services.

Revenue Support Grant

General government grant support towards fire authority expenditure.

Temporary Investments

This comprises of cash in hand, cash overdrawn and short-term investments which are readily convertible into known amounts of cash. These are deposited with banks or similar institutions.
